PROFESSIONAL EXPERIENCE

Associate Software Engineer

MVF – 1ST OVERALL IN SUNDAY TIMES 2020 COMPANIES TO WORK FOR, 2ND IN 2019 Oct 2019 – Now

- I had exposure to Typescript, React, Redux, Javascript, Jest, PHP, Laravel, Codeigniter, Node, Jenkins, Docker, Datadog and completed initial training at Makers Academy in Ruby / Rails via a mac and then on a linux machine.
- Worked on Dockerized Node S2S projects in Typescript with good test coverage and a nice CI/CD pipeline, with deploy approval steps in circleci and acceptance conditions in jira.
- Rotated on internal support, helping stakeholders with queries and trying to solve bugs.
- Reviewed and had my code reviewed by colleagues.
- Worked across approximately 40 projects, from micro services to monolith.
- Created tickets on JIRA, taking part in story pointing and some planning.
- Created APIs using an internal service, after initial testing on postman.
- Triggering Jenkins crons to test events in staging or running commands in production.
- Logging to datadog and checking logs to ensure events are successful.
- Pruning docker containers / volumes.
- Gave some talks at team architecture meetings.

Wealth Management Assistant

CLOSE BROTHER ASSET MANAGEMENT

July 2017 – Jan 2019

Helping ultra high net worth individuals with the administration of their investments. It required discretion, attention to detail and patience, I was personally selected by the number one financial advisor in the London office and added to a business improvement forum just before leaving.

Sales

AMPP GROUP

Apr 2017 – July 2017

I exceeded all call targets to establish sales calls between my Sales Director and CEO level customers but I didn't enjoy the sales environment.

Wealth Management Assistant

THOMAS MILLER WEALTH MANAGEMENT

Mar 2016 – Apr – 2017

I helped design and build a complex new CRM system and worked as the right hand man of a high profile financial advisor, attending client meetings and helping with the administration.
