

Jeremy Smith

Software developer, cyclist, productivity and tech geek.

PROFESSIONAL EXPERIENCE

MVF Global, London — Associate Software engineer

October 2019 - PRESENT (Sunday Times 'best place to work' in the UK 2020, 2nd in 2019)

Since October 2020 I have been building Typescript, Node and MySQL S2S services, which are Dockerised, deployed via Circleci and have Jest test coverage.

My first 12 months consisted of rotating 50/50 between building APIs for stakeholders using Postman and our proprietary service and working on a legacy PHP/Laravel monolith.

I have planned, written up and completed my own JIRA stories and contributed to the weekly architecture meetings. I have worked across approx 40 microservices and monoliths.

Close Brothers, London — Wealth Management Assistant

July 2017 - January 2019

Helping ultra high net worth individuals with the administration of their investments. It required discretion, attention to detail and patience, I was personally selected by the number one financial advisor in the London office and added to a business improvement forum.

Thomas Miller, London — Wealth Management Assistant

March 2016 - April 2017

I helped design and implement a complex new CRM system, and worked as the right hand man of a high profile financial advisor, attending client meetings and helping with the administration.

EDUCATION

Makers Software Development Bootcamp, London

Taught the fundamentals of software development, such as MVC, OOP, TDD, Git, CI/CD, XP Programming, SQL, Ruby, Javascript.
